

degadur®

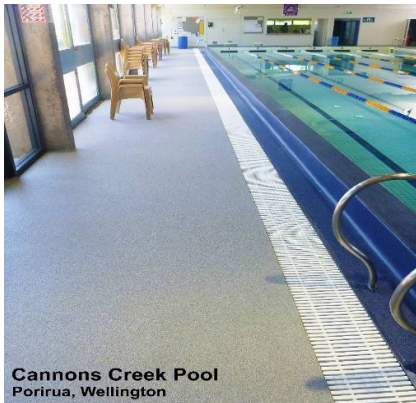

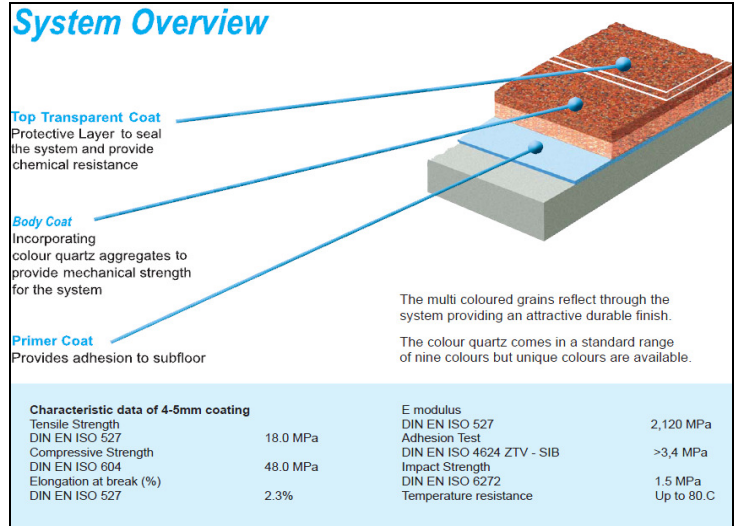

Reactive Resin Flooring

What is degadur?

Degadur is a high-purity line of MMA (Methyl Methacrylate) resins, produced in Hanau, Germany, and engineered specifically for industrial floors. It has been produced and continually evolving for more than 40 years and is recognized globally as a pinnacle of specialist flooring. Degadur floors are renowned for their rapid cure, notably attractive finish and ultra-low long-term maintenance costs. (www.degadur.com)

Advantages:

- **Full cure:** 2 hours.
- **Temperature:** full cure to -30°C
- **Chemical Resistance:** very high
- **Level of Waterproofing:** 100%
- **Anti-microbial properties:** acute
- **Resin-Rich:** Approximately 3 ½ times more resin than similar trowel-on epoxy floors
- **Food Safety:** NZ AsureQuality approved for use in food-critical and CIP areas
- **Inter-layer Bond:** Chemical. 100% guaranteed
- **Substrates:** Various. Timber/Concrete/Asphalt/Steel
- **Slip-Resistance:** Opus certified to meet AS/NZS 366.1.1:93 slip resistance requirements
